

NEWTOWN TOWNSHIP EAC & BIRD TOWN PRESENTS

NATIVE PLANT & SEED SWAP

SATURDAY, SEPTEMBER 27, 2014

Tips for Swappers:

Plants should be in a container. Seeds in an envelope or baggie.

Label as well as possible (annual/perennial, sun/shade, size, bloom color, etc.).

Bring boxes, flats, or trays to bring your new plants back in.

Plants should be well watered, disease and pest free. However, keep in mind natives are chewed on by bugs, and that's not all bad!

Dig plants a few days in advance so they can recover and water well!

North American native plants and seeds preferred; **see website for list of plants NOT allowed!**

Heirloom garden vegetable seeds welcome.

At Clark Nature Center, 235 Durham Rd

Rain or Shine

Bring a friend, but not your pet!

Please RSVP for more details:
newtown.tree@comcast.net

(Requested but not required)

What's a Plant Swap?

A fun way to find new homes for extra plants you may have (divisions, seedlings, cuttings, etc.) by trading with other gardeners.

Please stop even if you have nothing to trade, seeds/plants will be available for a \$1-2/donation.
All proceeds to benefit Newtown Township Bird Town.

Find more information and inspiration for gardening with native plants online at:
